

Trish Bellardine

UX/UI DESIGNER

To whom it may concern at Scorpion,

I am really excited to be applying for the User Experience position. This is the exact position I have been waiting for. I am an experienced designer with expertise in UX, UI, and development. I have been a follower of Scorpion for the past few years and have been developing my skills until the right position opened up. I believe my design skills align perfectly with what you are asking for.

The level of work executed from Scorpion is impressive and it's just the type of company that I see my self working for. I am very passionate about quality, usability, and performance.

Please visit my portfolio website to gain a better understanding of my work, and do not hesitate to call back so we can meet.

I am available to interview right away, my salary requirements are open for discussion. My full-time position as a Lead Designer and Developer is paying me 100k a year. I have 7 years experience and I recently completed my BS in web and graphics at the Art Institute and I have my UX certification ready for this role.

I can't wait to hear from you!
